EXPERIENCE

Relay Therapeutics

Cambridge, MA

Principal Scientist, Computation

2021-2025

- Built informatics platform (database, web applications, analytical tools) to enable hit finding with DNA-Encoded Chemical Libraries and Machine Learning (DEL+ML)
- Developed software infrastructure for analyzing NGS data from RNA-Display screening
- Automated ETL pipelines to link data sources, build ML data sets, generate project dashboards, and build structure-activity models to drive drug discovery projects
- Designed compound screening libraries to sample unexplored 3D pharmacophore spaces

ZebiAI Therapeutics (acquired by Relay Therapeutics)

Waltham, MA

Principal Scientist, Scientific Computing and Informatics

2020-2021

- Designed high fidelity DEL encoding/decoding strategy with built-in error correction
- Built informatics platform for DEL+ML hit finding and project management and reporting

Baylor College of Medicine Center for Drug Discovery

Houston, TX

Assistant Professor and Cheminformatics Leader

2015-2020

- Developed informatics infrastructure for DEL screening platform
- Led analysis and hypothesis generation from DEL screening data
- Taught graduate courses in computational methods for biomedical research

Yale University Department of Chemistry

New Haven, CT

Postdoctoral Associate with William Jorgensen

2012-2015

- Guided compound design for 2 medicinal chemistry projects (virtual screening, molecular docking, FEP)
- Developed database and web application for tracking medchem projects

University of Florida Quantum Theory Project

Gainesville, FL

Graduate Research Assistant with Kenneth M. Merz

2007-2012

- Developed methods for statistical error estimation in biomolecular modeling and quantum chemistry

EDUCATION

Yale University

New Haven, CT

Postdoctoral Associate Chemistry – Computer-aided drug design

2012-2015

University of Florida

Gainesville, FL

PhD Computational Chemistry – Statistical models for biomolecular simulation

2012

University of Arkansas

Fayetteville, AR

BS Chemistry – Synthesis of natural product analogs

2007

TECHNICAL SKILLS

Software Development: Experienced in developing scientific, statistical, data science, and web applications using Python (and common libraries including Django, pandas, scikit-learn, numpy/scipy, matplotlib, etc.), SQL, JavaScript, versioning (git), testing (pytest), workflow orchestration (prefect), infrastructure as code (pulumi), and deploying applications in cloud environments (AWS).

Chemistry-related: Experienced in developing and using cheminformatics methods including chemical fingerprints (2D/3D), virtual library enumeration and molecular diversity/property analysis, structure-based drug design, free energy calculations, quantum chemistry, Gaussian, Schrödinger, OpenEye, RDKit, Dotmatics/Vortex, Spotfire

CONTRIBUTIONS

Co-organized symposium at the American Chemical Society National Meeting	2013
Developed the Biomolecular Fragment Database web application for benchmarking molecular models	2012
Reviewer for scientific journals	2012-Present

HONORS

Crow Award for excellence in scientific publication	2012, 2011
Chemical Computing Group Research Excellence Award	2011

HIGHLIGHTED TALKS AND PRESENTATIONS

1. "Drug Discovery with DNA-Encoded Chemical Libraries" Invited talk at SLAS2020 conference, San Diego, CA 2020.
2. "Quantitative Comparisons of Enrichment from DNA-Encoded Library Selections" Poster presentation, 9th International Symposium on DNA-Encoded Chemical Libraries. Zurich, Switzerland 2019.
3. "Development of a Cheminformatics Platform for DNA-Encoded Library Screening" Poster presentation. NICHD Contraceptive Development Meeting. Minneapolis, MN 2018.
4. "Dotmatics and DNA-Encoded Chemical Libraries" Invited talk at Dotmatics User Group Meeting. Boston, MA 2017
